Plan: Raindrops On Roses

 1,654+ Sq. Ft.

 3 Bedrooms

 2.0 Bathrooms

Not everyday do you take a moment to appreciate delicate water droplets on brightly colored petals. But just imagine if we did? Whether you're coming or going, this plan offers a long foyer entry to give you just enough time to practice a higher level of mindfulness. To appreciate the spaces inside, organized as efficiently as overlapping petals on a rose... guest bedrooms tucked into the side of the home and a primary suite nestled in the back...connected by a large open kitchen, living and dining at the center. All on one floor and adorned with our designer curated package, Romeo & Juliet, that mixes bright whites, warm tones and satin brushed chrome throughout the entire house. Appreciate the everyday life surrounded with your people.
