It's the one that you want if you want a two-car garage and a Primary Suite on the first floor featuring a walk-in closet big enough for your poodle skirts and your head to toe black leather outfits. Ooh, ooh, ooh, honey, you'll be filled with affection at the large, light-filled family room and dining (perfect for a movie night, screening your favorite 70's flick.) The kitchen is designed with function and privacy in mind - take a look at the size of that pantry! Upstairs you'll find an amazing Loft area that's just calling out for a jukebox and a handful of quarters. When you're done rehearsing the moves to your favorite Grease Duet, you will find two additional bedrooms, a bathroom and storage. An added bonus - how about another iconic duo, Sonny & Cher? The match made-in heaven continues with this designer-curated interior package. Is this floor plan giving you chills? Us too.
